Empowering developers with advanced workflow features

Stop debugging local environments and spend more time launching sites in WordPress.

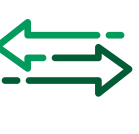

Automatic WordPress installation

Local sets up WordPress for you. One click and your site is ready to go, SSL included!

Advanced development features

Local offers root SSH access, WP-CLI, and the ability to hot-swap PHP environments for easy testing!

Local Connect

Push and pull sites like Flywheel or WP Engine for super streamlined offline-editing and go-live process from Local.
[Learn more.](#)

MagicSync

Our differential deployment technology intelligently recommends files to update and gives you control over which files to sync.

Live Links

Create persistent URLs to send your local WordPress sites to clients and coworkers without deploying.
[Learn more.](#)

One-click admin

No need to manage various usernames and passwords. Seamlessly log in to your WordPress site with one-click in Local!

A collection of pre-launch tools

Deploy your site with confidence, thanks to tools like Local's [Link Checker](#), [Image Optimizer](#), and [Instant Reload](#) features.

Cloud Backups

Keep your workspace clean and your site files safe with the ability to easily push and pull sites from Local to Google Drive or Dropbox.

Hear from the Local community

Local fans say the nicest things. Here are a few users who took to Twitter to rave about their favorite local development tool for WordPress.

Been running @LocalbyFlywheel Lightning beta for over a week now. PSA: It's everything it should be, and everything you need for simple, FAST, and local #WordPress theme/plugin development.

— Mike Hemberger (@JiveDig) December 2, 2019

I'm doing a side project with Wordpress. Decided to try @LocalbyFlywheel for local dev instead of messing with MAMP/WAMP/etc. Took about 2 minutes to get going with it. So far it's a very pleasant dev experience.

— Andrew Ek (@ektastrophe) February 10, 2020

So finally tried out @LocalWP and it's awesome. No more oversized virtual boxes!

— Patrick (@patrickmogela) April 4, 2020
